Portfolio: sb-milon007.github.io | LinkedIn: linkedin.com/in/lead-generation-shahin-biswas

PROFESSIONAL SUMMARY

Senior Executive Researcher with 2 years of experience in market research and operations, specialising in B2B lead research, data quality control and automation. I build web scrapers (Python, Playwright) and AI agents and workflows (n8n, LLMs) that collect, verify and deliver research data with far less manual work. Skilled in CRM-focused research and structured reporting. Currently pursuing a B.Sc. in Computer Science & Engineering.

SKILLS

- **Research:** Market research, company and prospect research, lead generation, LinkedIn Sales Navigator
- **Data & Quality Control:** Lead data verification, cleaning and enrichment; product data QC; vendor data QA
- **Automation & AI:** n8n workflows, AI agents, LLM integration (OpenAI GPT-4, Groq, Claude), prompt engineering, Gmail API, Telegram Bot API, webhooks
- **Web Scraping & Data:** Python, Playwright, Selenium, Requests, BeautifulSoup, pandas, openpyxl, Google Sheets API, data cleaning and de-duplication
- **Tools:** HubSpot CRM, LinkedIn Sales Navigator, Studio Designer, NeverBounce, Hunter.io, Google Sheets, Excel
- **Strengths:** Hard working, strong communication skills, computer literacy, problem solving, quick learner

WORK EXPERIENCE

Senior Executive Researcher, Market Research
Accord Tech Solutions, Dhaka, Bangladesh | 2 years (Present)

- Conduct lead research and processing with LinkedIn Sales Navigator, including data verification, cleaning and quality control for USA and UK markets; research companies, prospects and services (email-based lead, influencer, Google Review and funding research); and support HubSpot CRM research and automation and email marketing campaigns.
- Perform web scraping and AI-assisted automation (n8n) to collect and structure research data and reduce repetitive tasks, followed by Quality Assurance (QA) of the output: product and vendor data QA in Studio Designer for the Coding Department (SKU source URL updates, image quality control, and comparison against source files to identify mismatches, missing information and outdated data), and structured QC and performance reports on researchers' output in English and Bangla.

AI AUTOMATION PROJECTS

AI Email Auto-Reply Agent | n8n, Gmail API, LLM

- Built an n8n workflow that is triggered by each new email, structures the message, uses AI to understand the intent and sends a personalised, human-like reply instantly; used for lead-generation conversations, client inquiries and initial qualification emails, saving hours of manual email handling every week.

AI Chatbot Agent | n8n AI Agent, Groq LLM

- Built a real-time AI chatbot in n8n using a chat trigger, an AI Agent node and the Groq chat model, with memory and tool slots ready for extensions; a fully working chatbot in three nodes without custom code.

AI Customer Support Chatbot | n8n, OpenAI GPT-4, Webhooks, Google Sheets

- Designed a 24/7 support agent with session memory and intent classification that escalates complex queries to a human and logs every conversation with timestamps.

Telegram AI Assistant | n8n, Telegram Bot API, OpenAI

- Built a Telegram bot that answers questions in natural language, runs custom commands, sends scheduled updates and pulls live data from external APIs.

Student Enrolment Automation | n8n, Google Sheets API, Gmail API

- Automated form submissions into Google Sheets with instant student confirmations, admin alerts and duplicate detection, removing manual data entry.

Company Funding Research Agent | Python, Claude AI, SEC EDGAR, USAspending API

- Built an agent that turns a list of company domains into verified funding profiles (venture rounds, totals and PPP/SBA/grant awards), matching companies on name and address and linking every figure to its source, with an independent data-quality checker.

Online Candidate Screening Platform | Python, HTML, SMTP

- Built a secure LAN-based hiring test with timed MCQ exams, server-side scoring, full-screen lock, cheating-event logs, a live admin dashboard and automatic result emails.

WEB SCRAPING & DATA PROJECTS

Facebook Page & Group Post Scraper | Python, Playwright, pandas

- Scraped posts from Facebook pages and groups for any date range with exact publish dates, author, text and link; safe de-duplication, resumable checkpoints and Excel export.

Luxury Furniture Multi-Brand Scraper | Python, Playwright, Requests, BeautifulSoup

- Scraped five premium brands (Rejuvenation, Curry & Company, Hickory Chair, Bernhardt, Julian Chichester) into one Excel schema with SKUs, prices, 30+ dimension fields and high-resolution image URLs.

Interior Design Procurement Data Pipeline | Python, openpyxl

- Extracted 3,400+ procurement line items for two interior design firms, including vendors, PO numbers, costs, markups, deposits and room assignments, in an accounting-ready format.

B2B Lead Databases | LinkedIn research, email validation, data enrichment

- Built and QC-verified 7,000+ trade-show exhibitor records, a 33,000+ investor contact database and a 6,800+ executive recruiter list with 100% email validation.

EDUCATION

B.Sc. in Computer Science & Engineering
Prime University | Ongoing

Diploma in Engineering, Computer Science & Technology
Institute of Science Trade & Technology (ISTT), Bangladesh Technical Education Board | 2023 | CGPA 3.01 / 4.00

Secondary School Certificate (S.S.C), Science
National Bangla High School, Dhaka Board | 2018 | GPA 4.11 / 5.00

TRAINING & CERTIFICATIONS

- Cyber Security & Ethical Hacking, People NTech (Internship), 3 months
- Data Entry, Institute of Science Trade & Technology (ISTT), 3 months

LANGUAGES

- Bangla (Native)
- English (Professional)
